Re: 10-10<sup>th</sup> St. Case File PLN17101. Proposed Rehabilitation and Alterations of the Oakland Civic Auditorium

#### Summary

At its January 30, 2019 Design Review Committee (DRC) meeting, the DRC reviewed the proposed rehabilitation and new commercial uses for the Oakland Civic Auditorium. The DRC made the following comments:

- The design of the raised terrace may block the view of the niches;
- Design the raised terrace so that is easily removable from the main building;
- The facade of the raised terrace need to have similar materials, color and texture;
- Include high quality landscaping in front of the raised terrace, but don't block the facade entirely;
- The entry and pathway from Lake Merritt Boulevard through the parking lot and to the building needs more development to create a better pedestrian connection;
- Clarify the pedestrian pathway circulation around the property, and include details;
- Provide better color renderings of the building, raised terrace and entry pathway from the street.

The DRC also heard public comments relating to the following:

- The improvements to the site are supportable;
- The proposed raised terrace is compatible to the building;
- Consider the commercial uses for artists and local businesses;
- The site is underutilized for community uses, and is unclear on the proposed uses;
- The raised terrace would create a circulation concern, block the entries and niches;

- The project should allow the niches to be publicly accessible and serve as a gallery;
- The main building entry doors should be replaced with the original doors;
- The proposed south entry lobby needs to be larger, and like the existing lobbies;
- Reduce the extent of the new paving on the northwest parking lot, and Lake Merritt Blvd.

The DRC continued the item to the March 6, 2019 Design Review Committee meeting.

#### **STAFF REPORT**

**Case File Number: PLN17101** 

January 30, 2019

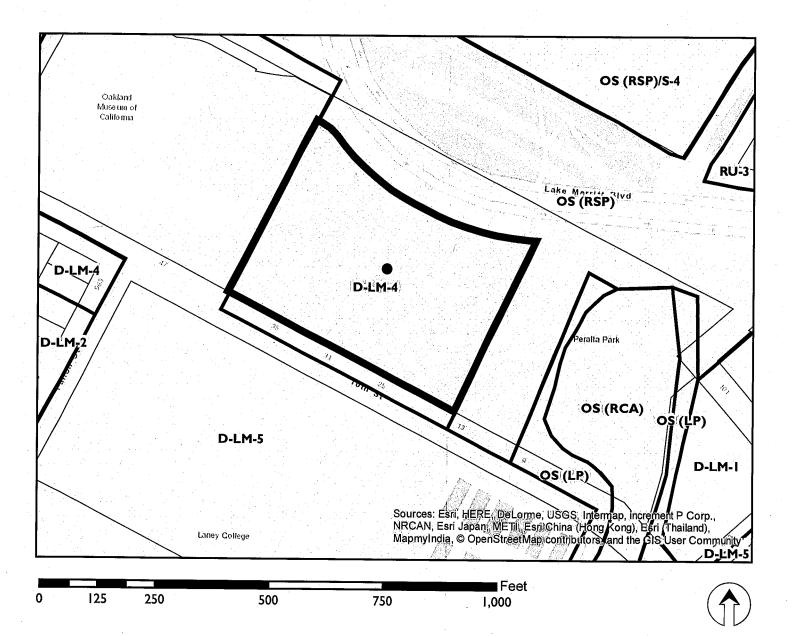

Project Location:	10 10 <sup>th</sup> Street (Oakland Civic Auditorium)			
Assessor's Parcel Numbers:	018 045000500			
Proposal:	To rehabilitate the vacant Oakland Civic Auditorium that consists interior and exterior building alterations, including site modificati to the walkways, landscaping and parking lot in order to facilitate new commercial uses and upgrade the entertainment venues.			
Project Applicant/ Telephone:	Orton Development, Inc. (510) 428-0800			
Property Owner:	City of Oakland			
Case File Number:	PLN17101			
Planning Permits Required:	Major Conditional Use Permit for Extensive Civic Impact; and Regular Design Review for site and building alterations.			
General Plan: Specific Plan:	Central Business District Lake Merritt Station Area District			
Zoning:	D-LM-4 Lake Merritt Station Area District Mixed Commercial			
Environmental Determination:	Under Review			
Property Historic Status:	OCHS A1+, Designated Historic Property API, Area of Primary Importance (Lake Merritt)			
City Council District:	3			
Project Status:	Referral for Review by the Design Review Committee			
Action to be Taken:	Provide comments to applicant and staff			
For Further Information:	Contact Case Planner, Mike Rivera at (510) 238-6417, or by email at <u>mrivera@oaklandnet.com</u>			

#### SUMMARY

Orton Development, Inc. (the applicant) proposes to rehabilitate the Oakland Civic Auditorium (OCA) to allow new activities at the property, which has been vacant for approximately 25 years. The OCA was built in 1913-1915 and is considered a City Landmark. The proposal includes alterations to the building, and modifications to the surface parking lot, driveways, pathways and landscaping. The property is accessible from Lake Merritt Boulevard and 10<sup>th</sup> Street. The site is located to the south of Lake Merritt and the Lake Merritt Amphitheater. The OCA is surrounded by a chain-link fence and is not accessible to the public, except for the surface parking lot that is currently used as an auto fee parking.

The proposal requires a Major Conditional Use Permit, and Regular Design Review. A CEQA analysis is under review to determine the type of environmental review required. The project requires approval by the Planning Commission at a future public meeting. Staff is seeking design review comments on the project prior to forwarding the application to the Planning Commission. In addition, the proposal will be presented to the City Landmark Review Board for comments and direction on the February 4, 2019 meeting.

## **CITY OF OAKLAND PLANNING COMMISSION**

Case File:PLN17101Applicant:Nicholas OrtonAddress:10 10th StreetZone:D-LM-4

Case File Number: PLN17101

#### **PROJECT SITE AND SURROUNDINGS**

The Oakland Civic Auditorium (OCA) is located to the south of the Lake Merritt Amphitheater at 10-10<sup>th</sup> Street. The OCA is three stories tall and sits on a 4.80 acres parcel. The main entries to the building are on the north, west and east sides. A parking lot with approximately 164 parking spaces is located on the north and east sides of the building, and is accessed from Lake Merritt Boulevard and 10<sup>th</sup> Street (via two driveways). The site is mostly paved, but contains landscaping along the north of the property, including trees around the building and in the parking lot. The project site is surrounded by the Oakland Museum of California to the west, Laney College to the south, Peralta Park/ Creek Channel to the east and Lake Merritt Amphitheater to the north. The OCA property is served by different AC Transit bus lines, and the Lake Merritt BART Station is located approximately three blocks southwest.

The OCA is considered a City Landmark because of its historical and architectural value. The OCA is a rectangular-shape building with a steel frame and reinforced concrete that is visible from around Lake Merritt, and is considered a historic resource within the Area of Primary Importance (API). The building has strong architectural themes such as articulated niches, arched windows and concrete stairways that reflect to the Beaux-Arts style of that time.

#### **PROJECT PROPOSAL**

The applicant proposes to make alterations to the interior and exterior of the approximately 215,000 square foot, three-story and one-level basement building. The alterations would allow new commercial uses such as restaurant, retail and/or offices on the ground floor and basement. The proposal includes the rehabilitation of the existing Calvin E. Simmons Theater, and limited improvements to the central arena space and seating. The project includes site modifications to the parking lot, driveways, walkways and landscaping. Other improvements to the OCA involve the installation of new illuminated marquee signs on the building roof.

#### **BUILDING INTERIOR ALTERATIONS**

#### **Basement**

The alterations of the 76,800 square foot basement would replace the access stairway, elevator, stage lift and include the installation of new skywells to the first floor, construction of new storage, utility rooms and disposable/recycle loading areas. Approximately 27,522 square foot of the improved basement would be used for related commercial tenant uses and would be internally connected to the upper-floor level. The alterations to the basement would not increase new building footprint or floor area or change the exterior of the building.

#### First Floor

The alterations of the 76,900 square foot 1<sup>st</sup> floor level would remove the restroom and partition walls to reopen/regain the signature niches and restore the windows. The building alteration includes the removal of partition walls to restore the historic arena foyer and concourse, development of a new restaurant with outdoor seating and new bar concessions. The improvements would include the addition of two new light-wells in the center of the arena to provide natural light to the basement, construction of a south lobby, and replacement of the stage lift and alterations to the theater seating. The proposal also notes that all of the significant

### Oakland City Planning Commission Design Review Committee

architectural elements such as columns, coffered ceiling, and floor details would remain, and if needed these would be repaired to match to the original design. The existing south freight/loading entry would be improved.

#### Second Floor

The alterations to the approximately 17,000 square foot  $2^{nd}$  floor level would rehabilitate the stairways, remove partition walls from some of the niches, uncover the west side five windows along the theater corridor, and rearrange the theater seating for better circulation. The project would include the construction of three new separate loge box areas, and the addition of new dressing rooms. No changes would be made to the existing historic corridor/vaulted ceiling and arena bleachers. The project would also make improvements to the restrooms, and restoration to the theater seating if needed.

#### Third Floor

The proposal would not include any significant building alterations to the approximately 29,000 square foot 3rd floor level. The 3<sup>rd</sup> floor contains theater seating, ballrooms and foyers.

#### **BUILDING EXTERIOR ALTERATIONS**

#### **Building North Elevation**

The proposal does not involve any structural changes to the north facade of the building. All of the existing historic elements such as cornices, awnings, lighting and wall signage would remain and, if necessary be restored. The proposal includes the replacement and repairs, if needed, of the arched wood and glass windows located on the niches in order to support the historic character of the property. There are, however, two significant changes to the building facade. One is the replacement of all seven entry doors with new aluminum-glass doors; and the other is the capping of the seven entry concrete stairs with a new raised terrace.

The approximately seven-foot tall and 9,500 square feet Lake View terrace would be located in front of the building and would be used as an outdoor public seating area. The concrete terrace would include a 3.5 foot tall glass with a steel frame guardrail. The new 65-foot wide concrete grand stairway with steel hand railings would be located in the center of the terrace. The proposal also includes two new concrete access ramps, each located at the corners of the terrace. The face of the elevated terrace would be made of a sandblasted concrete wall and would include low recessed light fixtures, landscaping and a row of bollards located in between the improved front pedestrian pathway and parking lot.

A new illuminated marquee sign is proposed on the rooftop of the building. The individual channel letter and board signs would be mounted on a 63 feet wide by 12 feet high steel support truss frame. The signs would be set back at least two feet from the building parapet. The channel letter sign would be placed in the center, and the board signs would be located on the sides. The channel letter sign and arrow signs would be white acrylic and backlit. The two slim board signs would contain a programmable LED marquee sign with lights around the border of the boards. The applicant notes that the sign proposal is based on a 1949 marquee sign that once existed on the building. The existing *"Auditorium of the City…Dedicated by the Citizens…"* will remain.

#### **Building South Elevation**

There are no significant alterations to the south building facade other than repairing, if needed, the existing windows, entry doors, wall light fixtures and wall sign (Henry J. Kaiser Convention Center). The proposal, however, includes the new construction of an entry lobby with an ADA access ramp, light poles and a new awning. The new access ramp would be concrete with glass and steel frame guardrails. The two new round-glass light and steel pole fixtures would match the original ones. The project also includes a new illuminated marquee sign similar to the one proposed on the north side, and new landscaping along the building and within the new sidewalk.

#### **Building East Elevation**

Similar to the south building facade, the proposal does not include significant alterations to the east building facade. The applicant proposes to maintain and repair all of the historic design features such as the cornices, mullions, light fixtures, steel entry awning and doors. However, the most significant change is the removal of the cement wall to uncover and restore the five historic square-shape windows, located on the second floor.

#### **Building West Elevation**

The proposal does not include any significant alterations on the west side of the building facade. The project notes that all of the historic design features are to remain such as entry awnings, doors, wall lanterns and lantern poles. The project also notes that all of these design elements would be repaired, if necessary. The one building alteration proposed is the removal and replacement of the concrete ramp with a new concrete ramp that would contain a glass and steel frame guardrail. Other improvements include new landscaping along the building facade.

#### Rooftop

The project would make alterations to restore the skylights to their original form. The skylights are located on the north and south bays of the rooftop and extends to the east and west. The existing two flagpoles located near the east and west building parapet would remain including the maintenance access stairways. The project would include the new installation of solar panels along the south bay of the building rooftop. The approximately 58,000 square foot solar panel area would be placed on the downslope rooftop. The rooftop would also include the new installation of two illuminated marquee signs that are discussed in this report.

#### SITE ALTERATIONS- HARDSCAPE AND LANDSCAPING

#### Sidewalk / Pathway

The pedestrian sidewalk around the OCA would be replaced with new porous cast-in-place concrete sidewalk. The sidewalk contains a diamond-shape pattern to create contrast with the east driveway and north parking lot. The north sidewalk includes two new bulb-outs, and two pull-in loading and drop-off zone areas along 10<sup>th</sup> Street. A total of 15 Green-Ash and Honey Locust trees would be planted in the front side of the sidewalk along the south and west sides of the building. A mix of 26 creeping Jasmine and Fig vines would also be planted in the back side of the sidewalk along the south building facade, and the north face of the raised Lake View terrace.

The proposal includes new bio-treatment planters and hydro-zone landscape areas within sections of the sidewalk to manage stormwater runoff within the property. Other improvements within the sidewalk include the installation of concrete benches, light poles and bollard lights.

#### Lake Merritt Way Promenade

The proposal includes the removal of the two-way driveway and landscape median located on the west side of the building. A new, raised concrete promenade would be constructed on this pedestrian, vehicular and utility easement. The 60 foot wide and 270 foot long Lake Merritt promenade will be raised to level with the new sidewalk, and would serve as a public access pathway from 10<sup>th</sup> Street to Lake Merritt Boulevard, as well as a gathering area for the Calvin Simmons Theater. The surface of the promenade would contain hexagonal concrete pavers, colored concrete diamond-shape pattern, triangle-shape raised planters, trees, concrete benches, aluminum light poles and bollards along 10<sup>th</sup> Street and the main parking lot.

#### Parking Lot and Driveway

The property contains a parking lot with approximately 164 parking stalls, located to the north and east of the building. The proposal would remove trees, planting areas and replace the parking paving area. The larger parking lot to the north would maintain the six double-head light poles, located in the center of the parking lot. The parking lot area would be resurfaced with new asphalt concrete, provide six new ADA parking spaces, and contain decorative diamond-shape patterns. The surface of the smaller parking lot to the east of the building would have a new pervious concrete area, and the driveway would be asphalt concrete with decorative diamond-shape patterns. The parking lots would include two new ingress and egress parking barriers at the Lake Merritt and 10<sup>th</sup> Street driveways. The plan would include a cluster of six new Evergreen trees at the northwest and northeast corner of the parking lot. A row of eight Green-Ash trees would be planted along the eastside of the parking lot/driveway.

#### **GENERAL PLAN POLICIES/ GOALS**

The project is located in the Lake Merritt Station Area Plan which seeks to achieve the many diverse goals of the community, including well-connected, economically diverse, and vibrant neighborhood and regional destination. The Plan links the existing unique assets located within the Plan Area in a series of distinct hubs of activity: the Chinatown hub, the entertainment, educational and cultural hub including Laney College, the Oakland Museum of California, the Oakland Civic Auditorium, and the Lake Merritt BART Station, and the Eastlake Gateway hub.

In particular, the Plan notes that the OCA could provide an opportunity to activate the southern edge of the new Lake Merritt Boulevard and to contribute to an entertainment, educational and cultural node. Preliminary ideas for reuse of the OCA include uses as a community center or a performance arts center as it has been in the past, and it is a great potential resource for civic and commercial uses.

The proposed project is consistent with the Plan as follows:

#### Lake Merritt Station Area Plan Vision

Create a more active, vibrant and safe district to serve and attract residents, businesses, students and visitors.

The proposal would attract new commercial uses, rehabilitate the Calvin Simmons Theater and develop a new terrace and pedestrian promenade. The project would be a good reuse of the OCA because it would activate and energize the property with new commercial services and entertainment venues. The new terrace would provide additional outdoor amenities, thus making the property more attractive. The new promenade would also attract more foot traffic, and provide a better pedestrian connection to Lake Merritt.

Increase jobs and improve access to jobs along the transit corridor.

The proposal to rehabilitate the existing theater and arena would reestablish the entertainment venues, and create new commercial uses such as offices and retail. These new civic and commercial facilities would provide new job opportunities to local and regional residents, and support the corridor link between downtown and the Eastlake neighborhood.

Provide services and retail options in the Station Area.

The proposal would reestablish cultural and entertainment services in the rehabilitated civic auditorium. This would support future retail uses in the area.

Maximize the land use and development opportunities created through preservation and restoration of historic buildings.

The rehabilitation of the historic Oakland Civic Auditorium would reestablish the entertainment uses of the three-level theater, and reuse the arena with new commercial uses such as retail and offices.

#### Lake Merritt Station Area Plan Goals

Establish a sense of place and clear identity for the area as a cultural and community anchor and a regional destination, building on existing assets such as Chinatown, the Oakland Museum of California, Laney College, the Kaiser Convention Center, Jack London Square, Lake Merritt and the Lake Merritt Channel.

The Oakland Civic Auditorium (Kaiser Convention Center) is a historic property and a prominent feature of the City landscape. The proposal would reuse and activate the historic property that is within an active hub with different type of community activities. The mix of new civic and commercial uses, and construction of the terrace and promenade would make the OCA property more usable and attractive. The proposal would also be inviting to the public because the promenade will provide a link to the Lake Merritt.

Promote a more diverse mix of uses near the Lake Merritt BART Station, such as cafes, restaurants, music venues, retail stores, nightlife, etc., that activate the area as a lively and vibrant district.

The proposal would rehabilitate the three-level theater and introduce new uses that include retail and restaurants with outdoor seating. This combination of activities with the nearby museum, college and Lake Merritt would contribute to the social ambience, thus making the 14<sup>th</sup> Street Corridor District Plan more active.

#### ZONING ANALYSIS

The requirements of the D-LM Lake Merritt Station Area District Zones Regulations is to implement the Lake Merritt Station Area Plan. The development in this zoning district shall be consistent with the Lake Merritt Station Area Plan, of a high quality design, and include active ground floor uses where appropriate and feasible.

The project site is specifically located in the D-LM-4 Lake Merritt Station Area District Mixed-4 Commercial Zone. The intent of the D-LM-4 Zone is to designate areas of the Lake Merritt Station Area Plan District appropriate for a wide range of Residential, Commercial, and compatible Light Industrial Activities.

The following are the objectives of the D-LM Lake Merritt Station Area District Zones. Staff is also responding how the project complies with the objectives in *italics*.

Create a more active and vibrant Lake Merritt Station Area District to serve and attract residents, businesses, students, and visitors;

The proposal combines civic and commercial uses that would provide a mix of entertainment, service and retail activities that would attract public and business interest, thus generating active uses and supporting existing businesses around the Station Area.

Increase activity and vibrancy in the area by encouraging vital retail nodes that provide services, restaurants, and shopping opportunities;

The proposal would include restaurant and retail services on the ground floor of the building. The project would include a public terrace that would also be used for outdoor seating. The location and large size of the terrace would create a lively setting to the site. The project also includes a pedestrian promenade located at the entry of the Calvin Simmons Theater. The promenade that will link 10<sup>th</sup> Street to Lake Merritt would create a more active and vibrant site, thus making OCA more attractive to the public.

Improve safety and pedestrian-orientation;

The proposal would include street improvements such as new bulb-outs at the intersection of  $10^{th}$ Street and driveways. The project also would include the removal of the west side driveway, and installation of a new promenade, which would improve pedestrian access to Lake Merritt.

Increase the number of jobs and improve the local economy;

The project would generate employment opportunities related to the entertainment venue, office/retail and restaurant activities.

Encourage and enhance a pedestrian-oriented streetscape.

The proposal includes a new landscape promenade on the west, and improved streetscape around the building. The project also includes new landscaping around the modified parking lot.

#### Zoning Development Standards

The proposal is generally in compliance with applicable zoning regulations. However, the application should be revised to provide enough bicycle parking.

Development Regulations	Requirements	Existing	Proposed	Comments		
Minimum Lot Area	7,500 sq. ft.	208,842 sf.	208,842 sf.	Meets Code

Case File Number: PLN17101

#### LAKE MERRITT STATION AREA-DESIGN GUIDELINES

The Intent of the Lake Merritt Station Planning Area Design Guidelines is to complement the city wide design guidelines, and to provide certainty through the design review process when making decision for projects in the Plan Area. The OCA is a City landmark, and is one of the civic buildings within the Lake Merritt Specific Plan Area. The building has distinctive formal architectural character that reflects to the civic importance of that time, and identifies as a focal point of the community. The civic building has a large building footprint that covers the entire city blocks contains monumental entrances with classical architectural themes, symmetrical window and continuous facade details. Historic preservation and adaptive re-use are encouraged in the Planning Area.

The following Guidelines are applicable to the OCA project:

#### Historic Resources

<u>Adaptive Reuse</u>. Retain and integrate historic and architecturally significant structures into larger projects with adaptive reuse. When adapting or altering historic resources, consider the following in the outline below. Staff also provides a summary response for each in *italics*.

• Work within the existing building envelope is recommended; where additions are desired, they should generally be located on a secondary or rear façade.

The proposal makes interior building alterations to rehabilitate the theater, arena and basement to accommodate new commercial uses. The proposal includes the addition of a raised terrace (plinth) along the principal facade of the building that also faces the parking lot and Lake Merritt. Staff believes that the building addition would obstruct the prominent facade of the OCA, and thus visually impact the views of the large and articulated niches, and stairways.

• Retain and repair historic materials and architectural details, and avoid covering these with cladding, awnings, or signage.

The proposal would retain, repair and restore all historic materials and details within the interior and exterior of the building. The alterations would also remove materials to uncover the historic windows on the east façade of the second floor that were covered in the past.

• Identify historic materials and features, using historic photos when available, in order to preserve and rehabilitate historic character.

The proposal shows on plans historic design elements that would be kept and restored if needed. Project documents also show photos of the building when it was built in 1910 and other photos of the building in the late 1950s, including one of a marquee sign mounted on the building rooftop.

• Use materials and colors that complement the historic character of the property.

The proposal would restore some of the historic building features such as entry doors, canopies and light fixtures. The addition of a raised front terrace with a glass and steel frame rail, and installation of two illuminated marquee signs on the building rooftop need material samples to evaluate and determine the material quality that would keep in with the building character. • Consider consultation with a preservation architect to ensure renovations are compatible. Consult with City's historic preservation staff.

The proposal was reviewed by the project preservation architect, and the City's Historic Preservation Planner. Based on conceptual design plans, they understand that the project proposal meets the Secretary of the Interior Standards for Rehabilitation. However, they also agree that a conditional approval is not a final approval as more developed plans are required to be submitted for further review by the National Park Service, and State Historic Preservation Office before development commences.

#### **KEY DESIGN ISSUES**

Based on design plans provided, staff has reviewed the project and has the following comments for consideration by the Design Review Committee:

#### **Building Design**

#### **Raised Terrace (Plinth)**

The Oakland Civic Auditorium is considered a City Landmark because of its significant historical, architectural and cultural value. The proposal would replace the north concrete entries of the OCA with a raised terrace that extends approximately 400 feet along façade of the building. The seven-foot tall concrete terrace with a three and one-half foot tall glass guardrail would potentially visually obstruct the lower area of the prominent arched niches and entry stairs when viewed from Lake Merritt Boulevard and the Lake Merritt shore. Staff believes that the proposal would create an unnecessary impairment of the physical features that contribute to highest level of recognition of historic significance for the OCA..

Furthermore, staff has concerns with the use of sandblasted concrete material and glass with steel frame rail on the face of the raised terrace. Staff believes that the design of the terrace wall is more industrial, lacks distinguished design features, and contrast with the more traditional cladding, texture and color of the OCA.

Staff would support a plan for a larger terrace in front of the OCA if it is built at grade. The applicant may consider building a forecourt between the building and the parking lot. The forecourt would include a wider entry pathway that connects OCA from Lake Merritt Boulevard. The forecourt and pedestrian pathway could include distinctive paving materials, landscape barriers or planters, outdoor furniture, and bollard lights to create a separation from the parking lot.

#### **Parking Lot Modification**

The proposal would modify the 164 stalls parking lot located to the north and east sides of the building by removing trees and raised landscape planters, reconfiguring the parking lay out, replacing the asphalt-concrete, and maintaining the six double-head light poles located in the center of the parking. The parking lot includes new large and medium size diamond-shaped patterns to create contrast with the building geometry and provide visual interest. Staff supports the design creativity, but believes that the parking lot surface should have a simple design, one

that does not contrast with the OCA. Staff suggests that more emphasis should be put on the reinstallation of a new pedestrian pathway. Staff notes that the OCA is divided by the 100 foot depth parking lot from Lake Merritt Boulevard, and access to the front of the building is by an 8 foot wide concrete pathway that traverses the parking lot. The project plans show a 17-foot wide pedestrian easement that starts from the street and through the parking lot and ends at the building frontage. Staff believes that the parking lot modification should widen the pedestrian access, use subtle surface materials and landscaping to emphasize the entry, separate the parking lot, and visually make the building entry more prominent from public view.

#### New Pedestrian Promenade

The removal of the two-way driveway and median landscape would allow the construction of a pedestrian promenade. The new landscape promenade would provide additional public open space for outdoor events, and connect 10<sup>th</sup> Street with Lake Merritt Boulevard. The surface of the new promenade would be level with the new modified sidewalk on the west side of the OCA to create, a more unified, and improved pathway to compliment the rehabilitation of the OCA. The new pedestrian promenade would also make the main entry lobby of the Calvin Simmons Theater more spacious and attractive during concerts or performances, and overall provide a much better experience to the general public. Staff also notes that the pedestrian promenade extends through the side of the parking lot, and into Lake Merritt Boulevard. Staff is unclear how the promenade would transition through the parking lot because the diamond-shaped patterns on the ground may suggest to the public to walk within the parking lot. Furthermore, staff notes on the plans the installation of bollards at both ends of the promenade including two arrow signs on the ground that seem to suggest that vehicles may be using the promenade. Overall, staff believes that the promenade is a great addition to the site as it would create a more attractive setting, and make this section of the property more pedestrian-friendly and safe.

#### **CONCLUSION**

The rehabilitation of the historic building, and site improvements to the property would preserve the existing building and allow new commercial activities. As indicated in the body of this report, staff has some reservations about the addition of the raised terrace, parking lot reconfiguration and pedestrian promenade. Staff believes that these are issues that need to be addressed for the project to meet the required Design Guidelines, Goal and Vision of the Lake Merritt Plan Area including the applicable zoning standards.

#### RECOMMENDATION

Staff recommends that the Design Review Committee review the proposed project, and provide further comments to the project applicant prior to full consideration by the City Planning Commission. As indicated in the staff report, the applicant should consider the following:

- Replace the raised terrace with one that is at grade level.
- Place the new terrace access ramps at the ends of the front building.
- Provide a simple and subtle design to the surface parking.
- Make the pathway entry in the parking lot more prominent.
- Clarify the pathway from the promenade to Lake Merritt Boulevard.

### Planning & Zoning Summary

Construction Date:	1913-15	Ge	General Retail Sales		
Parcel:	18-450-5				
Lot Area:	208,842.5 sf	Off-Street Loading:	Offices:		
Zoning District: (Zoning Map)	D-LM-4 Central Business District	<i>(</i> 17.116.140 <i>)</i>	0-10,000 GFA 10,001- 24,999 GFA 25,000- 49,999 GFA 50,000- 99,999 GFA		
Historic Resources:	Area of Primary Importance (Lake Merritt) OCHS Rating: A1+		over 100,000 GFA		
	Local Landmark: Oakland Municipal Auditorium National Historic Landmark: No Heritage Property: No Designated Historic District: No Mills Act: No		<b>Civic:</b> 0-50,000 GFA 50,001- 149,999 GFA 150,000- 299,999 GFA over 300,000 GFA		
<i>Permitted Uses:</i> (Sec. 17.101G.030)	Retail, office, full service restaurants, limited service restaurants, community assembly, community education, recreational assembly, limited child- care activities		Minimum size for first re Length: Width: Height:		
Height & Bulk District: (Zoning Map)	LM-85				
Height Limits: (Zoning Map)	85' Maximum				
Hazard Zone:	Liquefaction Severity 5				
Off-Street Parking:					
(17.116.080)	Parking and Loading to Be Provided for New Facilities and Additions to Existing Facilities. The required amount of new parking and loading shall be based on the cumulative increase in floor area, or other applicable unit of measurement prescribed hereafter, after said effective date; provided, however, that for an activity occupying a facility existing on said effective date, new parking shall be required for said increase to the extent that the total of such existing facility and the added facilities exceeds any minimum size hereafter prescribed for which any parking is required for such activity.				

## Existing Parking and Loading to Be Maintained.

No existing parking or loading serving any activity shall be reduced in amount or changed in design, location, or maintenance below, or if already less than shall not be reduced further below, the requirements prescribed hereafter for such activity unless equivalent substitute facilities are provided.

## Building Code Summary

**Summary:** The structure is a single existing building with three stories and one basement level. The primary uses are Theater (Assembly Group A-1) and an Indoor Sports Arena Existing (Assembly Group A-4). Surface parking is located on the north side of the site

Construction Type: Existing: Type I-B

Number of Floors: 3

- Occupancy: Existing: A-1 / A-4 Proposed: A-1 / B / M / S
- Sprinkler.Proposed: Fully sprinklered per NFPA 13Gross Area:210,000 GSF

Ch 6 – Types of Construction:

STORMWATER MANAGEMENT PLAN SCALE: 1" = 60'

#### LEGEND

PROPOSED IMPERVIOUS PAVEMENT SELF-TREATING PERMEABLE PAVEMEN BIO-TREATMENT AREA

EXISTING IMPERVIOUS SURFACE TO REMAIN

EXISTING PERVIOUS LANDSCAPE TO REMAIN

SELF-TREATING LANDSCAPE

ANAGE AREA ROUNDARY VALLEY GUTTER FLOW LINE FLOW DIRECTION

#### SITE TREATMENT AREA NOTE:

THIS PROJECT IS NOT REPLACING MORE THAN 50% OF THE EXISTING IMPERVIOUS AREA AND THEREFORE MUST TREAT ONLY THE AREA THAT IS REDEVELOPED.

TOTAL AREA WITHIN SITE:	227,658 SF
TOTAL EXISTING IMPERVIOUS AREA:	194,358 SF
TOTAL NEW/REPLACED IMPERVIOUS AREA:	51,974 SF

PERCENT IMPERVIOUS NEW/REPLACED: 51,974/194,358 = 26.7% < 50%

#### STORMWATER MANAGEMENT NOTES

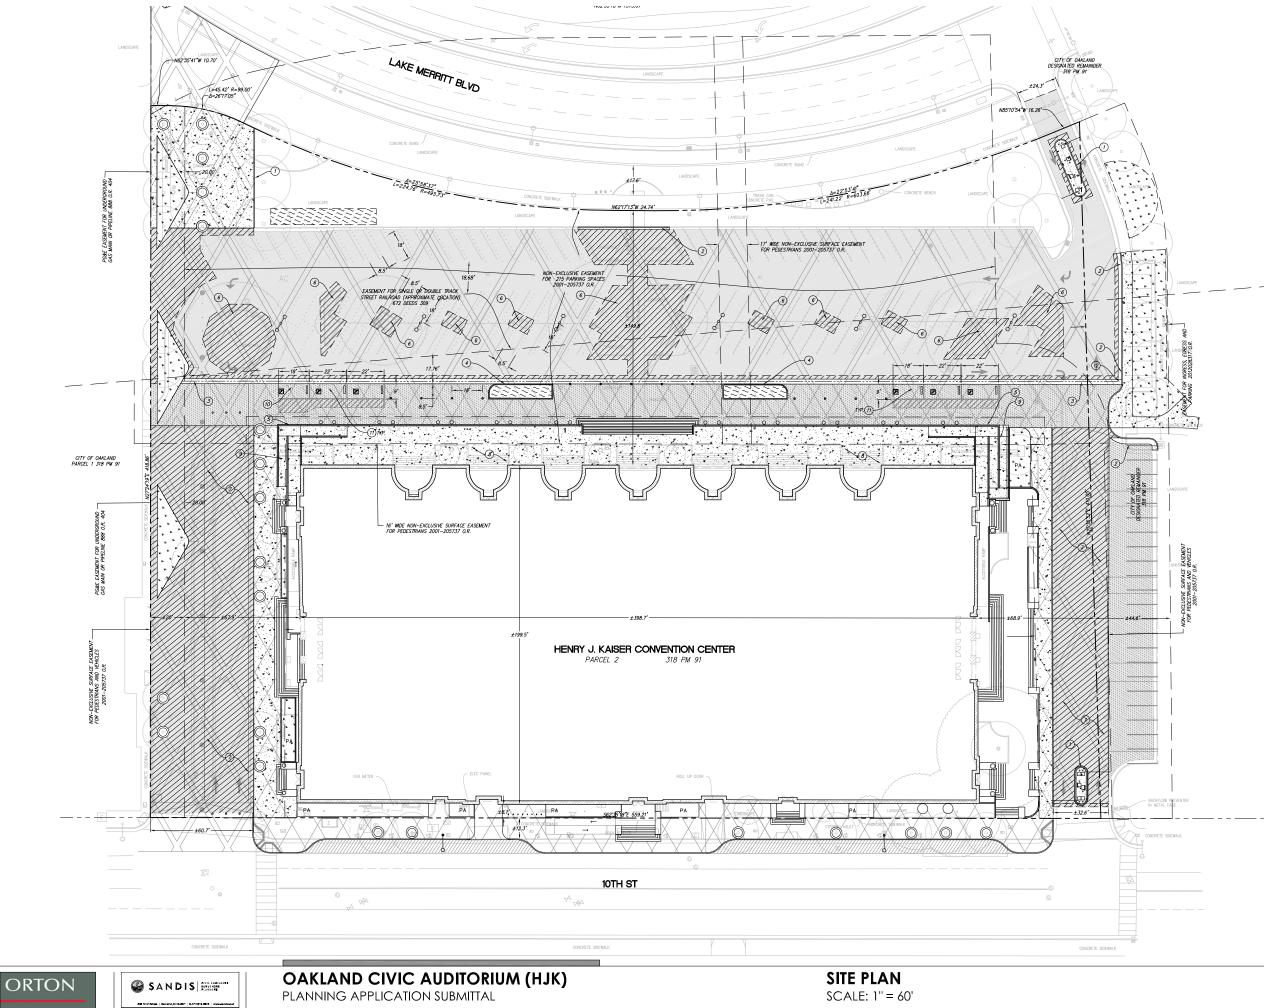

- THIS PLAN PRESENTS METHODS AND CALCULATIONS FOR COMPLYING WITH THE REQUIREMENTS OF PROVISION C.3 OF THE MUNICIPAL REGIONAL STORMMATER PERMIT IN ACCORDANCE WITH THE ALAMEDA COUNTY PROGRAM AND THE CITY OF OAKLAND REQUIREMENTS.
- 2. THE FOLLOWING TREATMENT MEASURES ARE PROPOSED TO REGULATE THE QUALITY OF STORM WATER LEAVING THE SITE
- 2.1. SELF-TREATING AREA RUNOFF IN THIS AREA ORIGINATES IN AND FLOWS THROUGH PLANTING PRIOR TO EXITING THE PROJECT SITE, NO TREATMENT IS REQUIRED
- 2.2. BIO-TREATMENT AREA RUNOFF IN THIS AREA IS DIRECTED TO A BIO-TREATMENT PLANTER FOR FILTRATION, INFILTRATION AND EVAPOTRANSPIRATION PRIOR TO EXITING THE SITE.
- PERMEABLE PAVEMENTS RUNOFF IN THIS AREA EITHER ORIGINATES OR IS DIRECTED TO PERMEABLE PAVEMENT MATERIALS FOR STORAGE AND INFILTRATION PRIOR TO EXITING THE SITE. 2.3.
- DRAINAGE MANAGEMENT AREA (DMA) OS CAN NOT FEASIBLY DRAIN TO LID TREATMENT MEASUMES DUE TO EXISTING FAKEMENT AREAS AND DRAINAGE STRUCTURE LOCATIONS. HIPERTORE, THE LID TREATMENT MEASIBLY BE INCREASED IN SUE TO TREAT EMSTING PAREMENT AREAS WITHIN DMA OS EDVINALENT TO THE NEW REPEACED IMPERVIOUS AREA WITH DMA OS.
- PROPOSED STORM DRAINAGE PIPING AND STRUCTURES SHOWN ON THIS SHEET ARE DIAGRAMMATIC AND FOR PERMIT REVIEW ONLY. REFER TO GVML UTILITY PLANS FOR CONSTRUCTION INFORMATION AND DETAILS.
- DRAINAGE MANAGEMENT AREA (DMA) OG CONSISTS OF EXISTING SURFACES TO REMAIN. HESE SURFACES INCLUDE PAVEMENT, LANDSCAPE, AND THE CIMO CENTER BULDIMC, AREAS MITHIN DMA ARE NOT FEQUINEET TO BE TREATED SINCE THEY ARE EXISTING TO REMAIN AND THE PROJECT DOES NOT EXCEED THE SOX RULE.

## 3. PLANS SHALL BE TYPICAL OF THER SPECES AND WATETY, HAVE NORMAL GROWTH HABITS, WELL DEVELOPED BRANCHES, DENSELY FOLATED, VICOROUS ROOT SYSTEM AND BE FREE FROM DEFECTS AND INLIDES.

4. Contractor shall report any sol or drainage conditions considered detrimental to the growth of the plant material. 5. All plant material shall be guranteed by the contractor to be in vicorous growing condition. Provision shall be made for a growth gurantee of at least two (2) years for trees and a minimum or two (2) years for shall be made at the beginning of the first succeeding planting sensity. All replacement shall have a gurantee could to the statid above.

QULITY IND SIZE OF PLATES, SPEED OF POIST, BUT AT INTEL (1) WIT FERDER WHEN QULRENT.
 QULITY IND SIZE OF PLATES, SPEED OF POIST, BUS SIZE OF BLLS, SPEED OF SIZE OF BLLS, SPEED OF PLATE, SPEED OF PLATE, SPEED OF POIST, BUS SIZE OF BLLS, SPEED OF PLATES, SPEED OF PLATES,

9. PLANTS SHALL NOT BE BOUND WITH WIRE OR ROPE AT ANY TIME SO AS TO DAMAGE THE BARK AND BREAK BRANCHES. PLANTS SHALL BE HANDLED FROM THE BOTTOM OF THE BALL ONLY.

10. PLANTING OPERATIONS SHALL BE PERFORMED DURING PERIODS WITHIN THE PLANTING SEASON WHEN WEATHER AND SOIL CONDITIONS ARE SUITABLE AND IN ACCORDANCE WITH ACCEPTED LOCAL PRACTICE.

11. NO PLANT, EXCEPT GROUND COVERS, SHALL BE PLANTED LESS THAN TWO (2) FEET FROM EXISTING STRUCTURES AND SIDEWALKS. 12. SET PLINTS PLUNB AND STRAIGHT SET AT SUCH LEVEL THAT AFTER SETTLEMENT A NORMAL OR NATURAL RELATIONSHIP TO THE CROWN OF THE PLANT WITH THE GROUND SURFACE WILL BE ESTABLISHED. LOCATE PLUNT IN THE CENTER OF THE PIT.

13. ALL INJURED ROOTS SHALL BE PRUNED TO MAKE CLEAN ENDS BEFORE PLANTING, REFER TO SPECIFICATIONS FOR PRUNING RECOMMENDATIONS

14. EACH TREE AND SHRUB SHALL BE PRUNED IN ACCORDANCE WITH STANDARD HORTICULTURAL PRACTICE TO PRESERVE NATURAL CHARACTER OF THE PLANT. PRUNING SHALL BE DONE WITH CLEAN. SHARP TOOLS.

15. TREES SHALL BE SUPPORTED MMEDIATELY AFTER PLANTING ONLY WHEN CONDITIONS MERT. ALL TREES SX (6) INCHES AND OVER IN CALIPER SHALL BE GUYED. SMALLER TREES SHALL BE STAKED. GUYING WIRES AND STAKES SHALL BE INSTALLED AS INDICATED.

16. SHOULD A PLANT BE UNAVAILABLE AT THE TIME OF INSTALLATION, ALL SUBSTITUTIONS ARE SUBJECT TO THE APPROVAL OF THE LANDSCAPE ARCHITECT.

17. Areas to be landscaped shall receive stockpiled topsoil to a minimum depth of four (4) to six (6) inches. Organic matter content of topsoil shall be a minimum of 4 percent. In the event that organic matter content is deficient, soil maindiments shall be added as necessary to achieve the required percentage.

18. PLANTING OPERATIONS SHALL INCLUDE THE COMPLETE REMOVAL OF ALL SYNTHETIC MATERIAL (IF USED) FROM THE ROOTBALL PRIOR TO PLANTING.

19. UNLESS OTHERWISE INDICATED ON DRAWINGS OR SPECIFICATION, ALL DISTURBED AREAS NOT PAVED OR MULCHED SHALL BE SEEDED.

20. WHEN TREE GROWTH BEGINS, ALL STAKES AND/OR GUYING SHALL BE REMOVED IN ACCORDANCE WITH SPECIFICATIONS. 21. CONTRACTOR SHALL LOCATE AND VERIFY THE EXISTENCE OF ALL UTILITIES PRIOR TO STARTING WORK.

3. LANDSCAPE ARCHITECT TO PROVIDE CAD FILE FOR STAKING OF LAYOUT AND ESTABLISHMENT OF CONTROL POINTS PER GRADING PLAN. 4. GRACE BREAKS SHALL BE DRRESSED AS SHARP CLEAN UNES IN FINISH PAVING AND LANGSCAPE AREAS UNLESS OTHERMISE NOTED. REFER TO FINISH GRADING SPECIFICATIONS FOR TOLERANCES. LANGSCAPE ARCHITECT TO REVEN ALL LANGSCAPE FINISH GRADING, PRIOR TO AND AFTER PLANTING.

2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PLANTING AT CORRECT GRADES AND ALIGNMENT.

3. ALL PAVING AREAS SHALL NOT EXCEED A 2% MAXIMUM SLOPE IN ANY DIRECTION UNLESS OTHERWISE NOTED.

4. FOR ALL BUILDING DOOR THRESHOLD DETAILS SEE ARCHITECTURE DRAWINGS.

SITE LAYOUT AND GRADING NOTES

PLANTING NOTES

5. ALL GRADES REFER TO FINISH PAVING GRADES UNLESS OTHERWISE NOTED.

6. THE CONTRACTOR IS RESPONSIBLE FOR MATCHING EXISTING STREETS, SURROUNDING LANGSOME AND OTHER IMPROVEMENTS WITH A SMOOTH TRANSITION IN PAVING, CURES, SUTTERS, SDEINLUS, LANGSOME, CRONG, ETC., MAD TO ANDD AVI ABULT OR APPRENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS OR HAZARDOUS CONDITIONS. PROVIDE A SMOOTH TRANSITION FROM LANGSOME AREAS TO INCHING PREVAMENTATION IN PAVING, CURES, SUBJECT OR AND AVIA ADVIATOR APPRENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS OR HAZARDOUS CONDITIONS. PROVIDE A SMOOTH TRANSITION FROM LANGSOME AREAS TO INCHING PREVAMENTATION FROM LANGSOME AREAS TO INCHING PREVAMENTATION IN PAVING, CURES, SUBJECT OR CROSS SLOPES, LOW SPOTS OR HAZARDOUS CONDITIONS. PROVIDE A SMOOTH TRANSITION FROM LANGSOME AREAS TO INCHING PREVAMENTATION FROM LANGSOME AREAS TO INCHING PRE

1. The documents describe design intent. Contractor is responsible for providing complete, operational systems and installations. All materials shall be furnished and installed by the contractor unless otherwise noted.

2. ALL DIMENSIONAL NOTES AND DETAILS SHOWING A PORTION OF A DRAWING SHALL APPLY TYPICALLY TO ALL OPPOSITE HAND AND/OR SIMILAR CONDITIONS, UNLESS OTHERWISE

3. THE CONTRACTOR IS RESPONSELE TO FIELD INVESTIGATE, AND VERIFY ALL CONDITIONS, ELEVATORIS AND DMENSIONS OF THE PROJECT, AS SHOWN ON OR REFERENCED ON THE DRAWNOSS. IF THERE ARE ANY DOSCREPANCES ETHEREN DWENSIONS OR GRADES IN DRAWNOSS AND DXSTING CONDITIONS WHIch HILL AFFECT THE WORK, THE CONTRACTOR SHULL BRONS SYCH DOSCREPANCES TO THE ATTRIDUNC OF THE LA TOR ALUSTINGHE TERRE PROCEDUS MIT THE WORK. THE CONTRACTOR SHULL BE RESPONSIBLE FOR THE PROPER FITTING OF ALL WORK AND FOR THE COMPONATION OF ALL TRADES, SUBCONTRACTORS AND PERSONS ENGAGED UPON THE CONTRACT.

4. REFER TO CIVIL DRAWINGS FOR ALL NOTES AND INFORMATION RELATED TO EXISTING AND PROPOSED UTILITIES INCLUDING LOCATION OF EXISTING UTILITIES PRIOR TO ANY SITE DEMOLITION OR CLEARING OR ASSOCIATED WITH ANY SITE GRADING OR TRENCHING OPERATIONS.

5. REFER TO STRUCTURAL AND ARCHITECTURAL DRAWINGS FOR ALL NOTES AND INFORMATION REGARDING BUILDING EXCAVATIONS.

6. ALL CONSTRUCTION ACTIVITIES SHALL BE PERFORMED IN SUCH A MANNER AS TO COMPLY WITH THE STANDARDS ESTABLISHED BY THE AIR QUALITY MAINTENANCE DISTRICT FOR AIRBORNE PARTICULATE (DUST).

Contractor is to submit a summary of all landscape submitles necessary for landscape work and associated scope itely for approval based on the approved listing of project landscape submitles contractor is to submit all necessary documentation in accordance with contract.

2. All shop drawings required as part of landscape improvements shall be coordinated with all associated disciplines, site and architectural conditions, drawings shall show adjuscent regramma that will give clara noication of the interface to structures, foundations, utilities, property unles and escentrations, no any other necessary regrammation.

1. ALL SITE WORK SHALL BE IN CONFORMANCE WITH TITLE 24 OF THE CALIFORNIA ADMINISTRATIVE CODE AND WITH THE AMERICANS WITH DISABILITIES ACT.

2. ALL PANIG AREA SHALL RE ACCESSIBLE PRI TILE 24. ACCESSIBLE PARIE OF TRAVEL ARE A BARRER-TREE ACCESS ROUTE WITHOUT ANY ARRIPE LIVEL OWNORS DICEEDING 1/2" IF BORLED AT 12. WAY SLOPE, OR VERTICAL LIVEL, OWNORS NOT EXCESSIONE 1/4" WAY, AND AT LEXEL 4" IN WOTH. SURFACE IS STARLE, FRIN, MOS UP RESSIMUT. CROSS SLOPE DOES NOT DICED 22. AND SLOPE ON THE DIRECTION OF DIRELS LISS. THAN AS, AND SCH DIRECTION FROM WOLL AND ABOVE 22" AND LESS THAN 80". LINDSCHARE AND LIVEL OF OVERHVARING DEGISTRATION TO BUY MINIMUM, AND PROTORNO GREATS GREATER THAN 4" PROJECTION FROM WOLL AND ABOVE 22" AND LESS THAN 80". LINDSCHARE ARCHITECT SHALL VERY THAT THERE ARE NO BARRERS IN THE PARIH OF TRAVEL.

1. REFER TO CML AND SITE UTILITY DRAININGS FOR ALL NOTES AND INFORMATION RELATED TO DEMOLTION, SITE PREPARATION, EXISTING AND PROPOSED UTILITES INCLUDING LOCATION OF EXISTING UTILITES PROR TO ANY SITE DEMOLTION OR CLEARING OR ASSOCIATED WITH ANY SITE GRADING OR TRENCHING OPERATIONS.

2. THE CONTINUTOR SHULL REVENT THE PLINS AND MAKE AN ASSESSMENT OF EARTHNORK BALAKE, BLICSS OR SHORTAGE. CONTINUTOR SHULL PREPARE BIOS SO AS TO INCLUDE ANY EDGESS INHOI MAY COLINE AND AS TO ANALIARE SPOL. STE IN EVANT OF AN EXCESS AND AS AS TO ANALIARE MATERIAL SUNKESS IN THE EVENT OF A SHORTAGE. INHUMINE COSTS. NO ANDITONIAL COMPENSION MULE ALL ALIADED DUE TO PROJECT ANTHNORK DESCES ON SHORTAGE.

7. ALL LIGHT FIXTURES AND OTHER SITE ELEMENTS SHALL BE SET PER DETAILS. ADJACENT GRADES SHALL NOT BE WARPED TO CONFORM WITH FIXTURES.

1. PLANT MATERIAL SHALL BE FURNISHED AND INSTALLED AS INDICATED INCLUDING ALL LABOR. MATERIALS. PLANTS. EQUIPMENT. INCIDENTALS AND CLEANUP.
